About Me

Hello! My name is Kate, and I am passionate about design! I would like to pursue a career as a UI/UX designer, so I am currently taking related classes at the City College of San Francisco.

Here is my portfolio of projects I was working on during my first semester of the Visual Design Foundation certificate program. Hope you like it!

SUNFLOWER

Photoshop Project

For this project, I used my Halloween photos to create a collage of fun army of sunflowers. I was working with layer masking to hide background details for each photo. I also added a type and a frame.

FUN FUN FUN
Club
CCSF DOWNTOWN CENTER

Illustrator Project

I made a logo for an existing CCSF student club that I am a member of. This logo can be used for any type of print media (flyers, social media, certificates, etc.) and also for digital media (videos, presentations, collages, etc.)

Animate Project

I applied animation to a student club logo for a future use of it in digital media such as video. You can check out the animation on my YouTube channel here: https://youtu.be/WxAGlxkztUQ (make sure to be logged in under your CCSF account).

Thank you!
